

Music Roadtrip Calendar Ingest - Current Workflow

Plain-English view of how Music Roadtrip turns approved sources into reviewed event and place data.

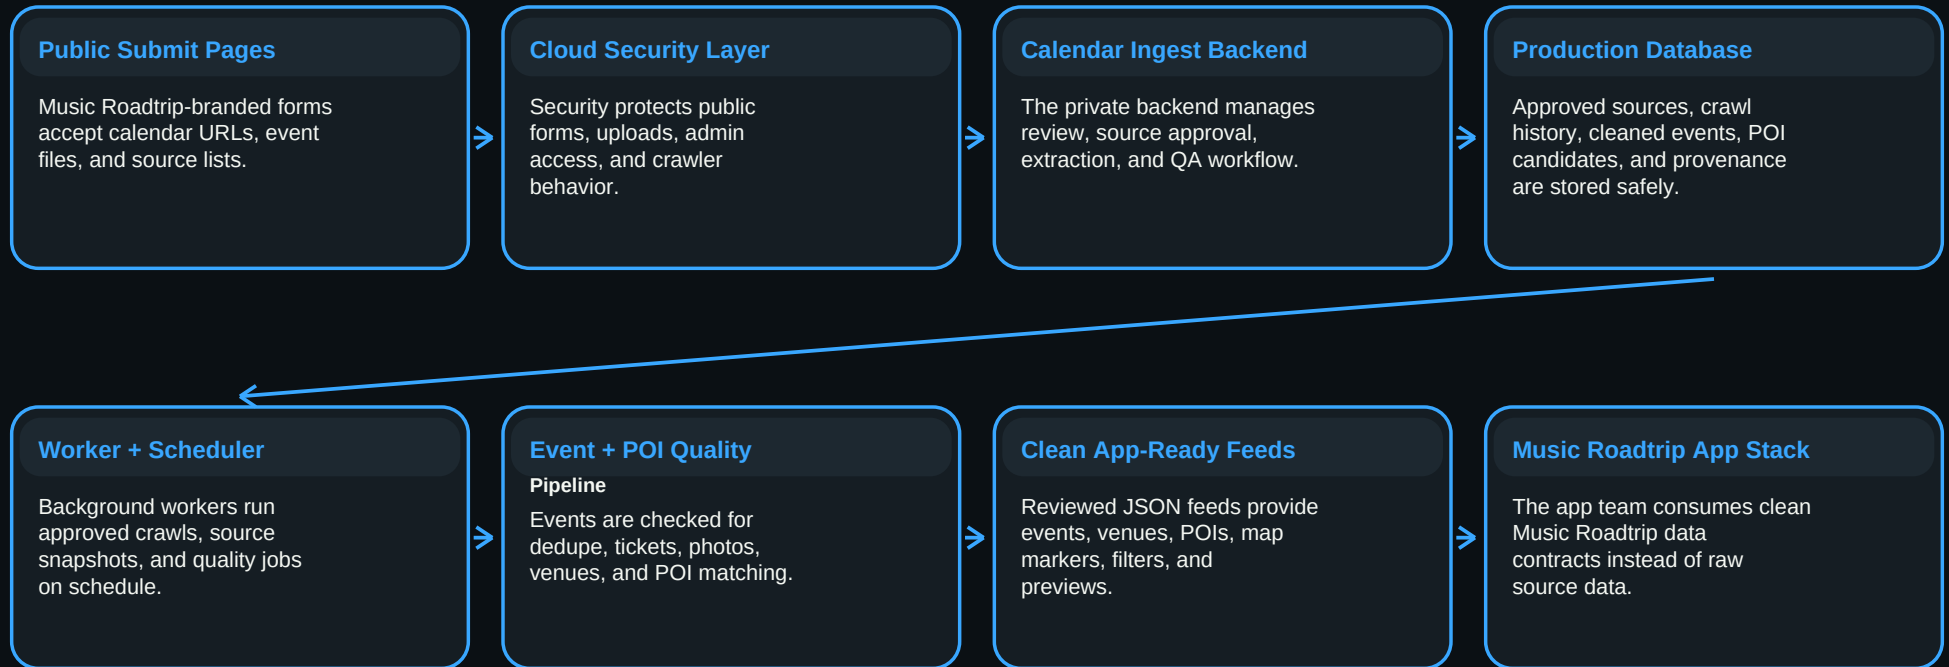

Guardrails

- Public submissions do not auto-publish.
- Admin approval controls what gets scraped.
- Concert/Event records remain events and are never POIs.
- Venues are matched to POIs or staged as POI candidates.
- App feeds use reviewed, deduped, QA-checked data.

Music Roadtrip Calendar Ingest - Cloud Implementation Workflow

Plain-English view of how Music Roadtrip turns approved sources into reviewed event and place data.

Guardrails

- Cloud security separates public intake from private admin workflows.
- Approved calendars enter the master registry before crawling.
- Scrape profiles remember how each approved calendar was handled.
- Raw crawl and provider data stays inside the review pipeline.
- Clean app-ready data is the handoff to the app stack.
